

BiomeWorld Whitepaper

Team introduction:

A Turt£e

- marine engineer
- Founder: needed a push
- Crypto degenerate

ScArlet Macaw

- College student in electromechanics
- founder: gave the push
- professional smartass

project introduction

BiomeWorld is a decentralised charity that anonymously collects liquidity for real world animal and biome conserving charity organisations that protect and saves animals together with their habitat. The project tends to provide these real-world charities a larger influx of liquidity by involving the crypto community which in this case is the ADA community and give a fun twist to donating towards these charities by making collectibles that could be traded further, by trading these collectibles you will continue to support these charities as the royalties will be utilized for further donations towards the charities themselves.

BiomeWorld created its own Cardano native token that will be majority community owned to collect liquidity to make its first major donation to sea shepherd as proof of our dedication the rest of the rest of liquidity will be utilized to grow our team and the creation of CNFT's

If blessed with a fruitful token sale the BiomeWorld team will adopt a turtle or even a nest and name it by choice of the community, the project will also plant a tree in the following countries: Belgium, Armenia, Tanzania, Congo, Madagascar, Peru and Argentina, we will also plant plenty of trees in Europe.

For both the turtle or turtle nest and the trees planted we will display our certificates of proof on the websites home page

Tokenomics:

- Max supply;
50.000.000.000 **\$BWT**
 - Available supply on presale;
44.999.999.991 **\$BWT**
 - Supply owned by founders;
10%= 4.999.999.999 **\$BWT**
- A Turt£e ;**
5%= 2.499.999.999,5 **\$BWT**
- ScArlet Macaw;**
5%= 2.499.999.999,5 **\$BWT**

CNFT collection:

We will have three big BiomeWorld CNFT collections that consist of living beings representing the charity that protects the animal or the biome for which the profits will be donated, the CNFT's for the protected biomes themselves will consist of the animals that inhabit the specific biome.

Our very first CNFT collection will be ocean inspired and a portion of the profit will be directly donated to Sea Shepherd and the Olive Ridley Project (ORP).

We will also have a forest oriented CNFT collection from which every CNFT sold will be 5 trees that will be planted by the Go Forest organisation. The trees will be planted in Tanzania, Congo, Madagascar, Peru, Argentina and the following European countries; Belgium, Ireland, Germany, Netherland, Italy, Portugal, Spain, France, Romania, Czech Republic and the United Kingdom.

BiomeWorld Arctic

The collection contributed to sea shepherd named “BiomeWorld artic” will consist of CNFT’s that represent artic land and aquatic beings. Our first line of CNFT’s will consist from a penguin

BiomeWorld Oceanic

The CNFT that supports the olive Ridley Project named “BiomeWorld Oceanic” will consist of CNFT’s representing tropical oceanic beings.

BiomeWorld Forestic

When purchasing one of our tree CNFT’s you will purchase/plant a tree in the country of the trees origin. As soon as possible we will send the certificate from the planted tree in CNFT form containing the same Metadata towards the address from which the CNFT was purchased with no extra costs. the royalties we receive from when the CNFT will be traded between 2 collectors we will donate 50% of towards the Go Forest organisation itself.

Our first forest CNFT’s will represent a Belgian oak tree.
